

1st Hole: Christy's Eagle

The great Christy O' Connor played Edenderry in the 1990's and after hitting the middle of the fairway with his drive he holed his second shot for eagle. Risk and reward hole, anything from a long iron to a 3 wood will set you up with a nice short iron to the green.

2nd Hole

Very deceiving hole and probably one of the toughest, where the wind really comes in to play. You can hit anything from an 8 iron to a 3 iron, but misjudging the wind and par is very unlikely.

3rd Hole: Peadar's Gap

Edenderry's signature hole, one of our toughest par 4's. You have to be long and straight and bisect the fairway to have any chance of hitting the green in two. A tough green with some very deceiving slopes and again get pin high or you're in for a 3 putt.

4th Hole

Long hitting members will take on this short par 4 but the tee shot is vital. Long iron or a 5 wood which will leave you a flick of a wedge to the green. Don't overshoot this green.

5th Hole:

Looks straight forward and easy but you have to hit the fairway. Small sloping 2-tiered green, no mistaking where the pin is on the green. It will be a good 2 putt to make par.

6th Hole

It will take two long bombs to have any chance of hitting the green. Lay up to a nice wedge approach shot, to one of our best 3-tiered greens, sloping from back to front.

7th Hole

Again a par 5, which requires two long straight shots to reach the green and avoid the bunkers either side of the green, which come in to play quite a lot.

8th Hole

Long par 3 to a fabulous 2-tiered green guarded by a big bunker to the front right of green. Again you must figure out which way the wind is blowing or pay the price.

9th Hole

If you're going well, better to play a long iron or 5 wood, to keep the water and tree's out of play. You should be left with a mid-iron to the green.

10th Hole

This requires a straight 200 yard shot off the tee, which will leave a mid-iron to the very unusual green. Only big dogs dare hit driver. Don't be fooled by the green it's usually a straight putt no matter where you are or where the pin is.

11th Hole

Easiest par 5 on the course, just keep it on the fairway and avoid out of bounds to the right and par comes easy.

12th Hole

170 yard par 3, guarded by a big bunker to the front right. Club selection here is vital and take note of the prevailing wind.

13th Hole

Long straight par 4, which usually plays into prevailing wind, only big hitters will hit this in two. Again a good big green, sloping from back to front guarded by two big bunkers on either side.

14th Hole

Keeping your drive on the right side of fairway to avoid the fairway bunker and to have a nice, clean, open shot to big green. Wind also plays a big factor here too.

15th Hole

The tightest of all par 4's which hitting fairway with drive is a must, if you want to have any chance of par. A big 2-tiered green, in which you must get pin distance right.

16th Hole

When on the 13th tee, always look left and check out where the pin is on 16, and you're half way there to playing the hole. Wind is a huge factor which you can't feel on the tree-guarded tee box. The secret here is to just hit center of green.

17th Hole

The great Johnny Brady would describe this as the best hole on the course. It's long and dog-legged and the best way to play this hole is up the right side of the fairway. With a big green, sloping from back to front.

18th Hole

Nolan's Alley: Very tight par 4, trees to the left and right requires a long straight drive leaving a short iron to one of our toughest greens on the course. Great finishing hole.
